

How to avoid the 7 BIGGEST mistakes people make when hiring a plumber

NEVER before revealed SECRETS from professional plumbers at MULGAS Ltd

With this knowledge you will understand why all plumbers are not the same

#1: You hire a plumber who doesn't guarantee their work. Simply ask “ what is your guarantee”. Reputable plumbers always give guarantees. Backyard companies don't.

#2: You hire a plumber who does not have the appropriate qualifications AND insurance: Amazingly only around one in ten plumbers hold formal certificates of competence and less hold liability insurance.

#3: You only hire on price: It is impossible to offer cheapest price, high quality and 1st class service.

Value= Quality + service + price

#4: You believe all Plumbers are the same. They are not. At MULGAS all engineers have at least five years of training behind them.

#5: You always have plumbers competing with each other for your work. Price is important but should not be more important than quality and service.

#6: You think having the right tools is all a plumber needs to do your job. Even with all the latest gear your plumber still needs how to use it properly otherwise the job may turn out worse than it was to begin with.

#7: You don't give your plumber enough time or give him the facts to do a quality job. Communicate with them from the start and leave them to do a proper job!

Mulgas, people you can trust
